CLASS

STYLE

OPTION

BUTTED SEAM

Machine produces a flat, one-thread butted seam (standard configuration).

STITCH MULTIPLIER

Machine is designed with a non-differential mechanism for increasing the stitch count, particularly at selvages.

GAP

Machine creates a gap between the joined ends of the fabric.

ROLL

Machine creates a rolled seam at joined ends of fabric.

HIGH PILE

Machine is engineered for use on high pile fabric.

2-THREAD

Two-thread locked stitch machine.

NICKEL PLATE

Machine is chemically nickel plated for use in wet and harsh environments; extreme corrosion resistance.

RAIL

Machine is designed to be mounted on a railway sewing system.
